

medications that have a caution or warning regarding operation of vehicles or machinery.

- 8.A.2 No one having less than 4 hours sleep in the 24 hours prior to a patrol shall be permitted to serve as a crew member or participate as a trainee on an Auxiliary facility.

8.B Crew Candidate Pre-underway Tasks.

- 8.B.1 Auxiliarists who are not certified as coxswain or crew are designated as Trainees when aboard an Auxiliary facility which is under orders and underway. Prior to their participating on patrols aboard an Auxiliary facility trainees must have signed-off by a boat crew or coxswain mentor the Auxiliary Boat Crew Qualification tasks listed in Table 8.1 : (See Auxiliary Boat Crew Qualification Guide, Volume 1, Crew Member, COMDINST M16794.52(series))
- 8.B.2 Auxiliarists who have not completed the tasks listed above may not be a guest aboard an Auxiliary facility.
- 8.B.3 Coxswains accepting patrol orders are to ensure that trainees aboard the facility have completed the tasks listed in Table 8.1.
- 8.B.4 Non-adherence to the requirements of this Section is not a cause for denying patrol expense reimbursement, but may be cause for referring the coxswain to the Auxiliary Chain of Leadership and Management for disciplinary action as provided for in the reference (a). AOM OIA may suspend issuing orders to a coxswain pending the Sector North Carolina OIA's determination and guidance regarding the incident.

Table 8.1 - Crew Candidate Pre-underway Tasks

Qualification Task Nr.	Task Title
01-01	Crew Fatigue
01-03	Team Coordination Training
02-03	Symptoms and Treatment for Shock
02-05	Direct Pressure, Pressure Points and Tourniquet Method to Control Bleeding
02-06	Signs and Treatments for Burns
02-07	Symptoms and Treatment for Hypothermia
02-08	Type III PFD, Anti-Exposure Coverall, Or Dry Suit Swim
02-09	Boat Crew Survival Equipment
02-10	The Use of Hand-Held Distress ^{Signal Flares} Flares
02-11	The Use of Hand-Held Distress Flares
02-12	The Use of Aerial Flares
02-13	Operate the Personal Marker Light (PML) or Strobe Light
02-14	Survival Procedures In Event The Boat Capsizes Or Swamps
04-04	Identify Common Sound Signals Used by Vessels
05-01	Operate a VHF FM Radiotelephone
07-01	Man Overboard - Pointer

8.C Minimum and Maximum Crew

- 8.C.1 Reference (b) prescribes minimum crew requirements for Auxiliary facilities. However, coxswains of facilities less than 26 feet length are encouraged to augment the crew by at least one member so as to be prepared for operational situations such as SAR, providing assistance to vessels, adverse environmental conditions, or causality to a crew member. The additional crew member will enhance maintenance of situational awareness during stressful operations.
