Dear Valued Customer:

Walter Kidde Portable Equipment Inc. ("Kidde") in conjunction with the U.S. Consumer Product Safety Commission (CPSC) announced a voluntary recall to replace certain Kidde black plastic Zytel® nylon valve disposable fire extinguishers. To view the release, please visit <http://www.cpsc.gov/en/Recalls>.

This replacement program was initiated because, in a small number of cases, certain disposable fire extinguishers may not fully discharge as designed when the lever is pressed and released multiple times. The cause is an out-of-specification valve component.

This recall involves Kidde ABC and BC-rated fire extinguishers manufactured between July 23, 2013 and Oct. 15, 2014 and sold between August 2013 and November 2014. Models are as follows:

You can find the model number and serial number on the unit's label. The date code is part of an ink jet 10-digit number stamped on the cylinder near the bottom. To determine the date code, look at digits 5-9. They convey the date and year of manufacture.

For example: Date code is 0101273145. You look at digits 27314, which signify it was manufactured on the 273rd day of 2014, or September 30, 2014. This unit would be affected.

We are looking for units with these five digits in the date code:

2013: XXXX20413X through XXXX36513X

2014: XXXX00114X through XXXX28814X

This letter is to inform you that some of the FX units you purchased may be affected by this recall. To determine if you have an affected unit, please visit the CPSC website listed above or contact Kidde at 1-855-283-7991 or [www.Kidde.com](http://www.Kidde.com) to determine whether your extinguishers are affected.

We apologize for any inconvenience this may cause and thank you for your cooperation in this matter.

Sincerely,

Chris Rovenstine
