This line must print 1/2" from top of sheet

This line must print 3/4" from edge of sheet

Test Page: Before you decide to buy blanks to print your cards, print this sheet first. Check to see that the marks shown here appear at the correct place. If they do, you're all set. If not, you can still print your own cards, but you cannot use pre-diecut blanks. You will have to trim your cards manually. Unfortunately, Acrobat has no controls to change margins. You *may* be able to select a "custom" sheet size - for instance, 8.25" instead of 8.5" to force the printer to image closer an edge; likewise, specifying a shorter sheet (10.5") instead of 11" may allow you to change where your printer begins printing from the top of the sheet. We're sorry, but we cannot offer multiple layouts.
