

New Notice to Mariners Format

John Collins, USCGAux, SBOS ADSO-PE

The U.S. Coast Guard Navigation Center (NAVCEN) announced the launch of its updated Local Notice to Mariners (LNM) and Light List application during the week of December 2024.

This upgraded application allows you to download and print LNM's for entire Coast Guard Districts or define your own area of interest using the GIS tools to zoom in and access localized data. The form section enables you to organize and sort LNM's by waterway or category. For programmatic integration, you can download GeoJSON files for data ingestion into other applications.
