

Recall Tracking

John Collins, USCG Aux SBOS ADSO-PE

If you want to check to see if your boat or motor has any recalls you may go to this website at www.uscgboating.org/content/recalls.php. From there you can search by MIC, Company, Model and Model Year. While the search results will provide recall information related to those fields, it will not identify if a specific boat is affected by a recall.

The Coast Guard is working to enhance the system for individual boats by entering the 12 digit Hull Identification Number (HIN).
