### HOW TO ATTACH A FILE

- Note that Adobe software updates may result in new menu appearances that vary from the instructions below. The general attachment process should remain similar. Full instructions with screenshots can be found on the W Directorate website on the SR Training page.
- With this 7000 form open in Adobe Reader, find the column of 5 icons at the left edge of the document area. The top icon is likely a mouse arrow, and the second icon should be a comment "speech bubble" icon. Select the comment icon to access the comment popup.
- In the comment popup, select "ATTACH FILE." Your pointer will change to a push-pin cursor.
- Move the push-pin cursor to the location where you want to attach a supporting file. It is recommended that files be attached in the dedicated ATTACH section on page 2.
- Click to place the icon. An "Add Attachment" window will open that contains your file directory.
- Navigate and find the file you wish to attach, highlight it, and then click Open (PC) or Select (Mac). The pushpin/paperclip icon will place itself in the location you have chosen.
- At the same time a File Attachment Properties window will open. Click OK and your file is attached.
- If you hover your cursor over your file Icon, it will display your name and the name of the attached file.
- Anyone can then double click on that Icon to Open the attached file.
- A right-click (PC) or control-click (Mac) will bring up options that will allow you to Delete the attachment from the 7000.
- It is strongly recommended that all attachments are in the PDF format. If other formats are attached, consider whether a recipient will be able to open on his/her system. Large files, photos, and videos are prohibited and should not be attached.

### TEXT ENHANCEMENTS ALLOWED

*There are two ways to invoke rich text*

  - To turn on UNDERLINE use Control+U. To turn off UNDERLINE use Control+U again.
  - To turn on *ITALICS* use Control+i. To turn off *ITALICS* use Control+i again.
2. - Right-click in the Field and a window will offer "Text Style". Click on this and it will offer the same text enhancements that the first method offers.
  - To turn off any Rich Text enhancement, right-click again, click on "Text Style" and then remove the check mark from the style you were using.
  - It also offers to remove all text formats, if you have previously included any in the Field.

### HOW TO LOCK DATA ON THIS FORM (OPTIONAL FEATURE)

- After inputting data on this form, a user can Lock that data so that it cannot be changed by anyone else.
- To do this - at the top right corner of page 2 there are "LOCK" and "UNLOCK" buttons. After clicking on the "LOCK" button it will ask for a password. The password can be anything of the user's choosing as long as it contains at least one alpha character. After entering the password, click on the "SET" button and all the data on the form will be protected from change.
- 'Remember' your password, because if you need to make changes to the form at a later date, only you will know the password needed to "UNLOCK" the form.
- To "UNLOCK" the form, simply click on the "UNLOCK" button and it will ask for your password. Enter your password and click on the "SET" button and it will completely unlock the form to allow changing of all or some of the data.
- The form can then be re"LOCK"ed using the same password or a new one.
