The PV program within Division 10 is building momentum early in 2018. 3 out of the 4 Flotilla's started connecting with their Program Partners. Out of our 4 Flotilla's, 3 have started to distributed their PE training schedules for ABS courses given this year within our Division. As always Safe Boating Materials were distributed while performing the PVs along with face to face communication with our partners. Out of the reporting Flotillas. Division 10 has completed over 150 Program Visits this year.

Respectfully submitted.
