August Report 054-10-01

It is with great pleasure to report the amazing things going on in 10-01. We have had some great teamwork, energy and devotion to duty! Below I have listed some of our great accomplishments.

PV 800+
PE Students 80+
VE 400+
2 new crew trainees
1 new coxswain trainee
4 new members
66% complete AMT
50% 2017 dues collected

One issue that has recently surfaced, apparently we have multiple flotillas servicing the same PV partners. Now most of these partners have been established within our flotilla be we have had an increase in our PV haven their materials and brochure holders removed by other flotillas or the business partner. Most of the brochure holders have been purchased out of pocket by the PV and it cost them money to replace it. I understand that there is no established AOR but I feel it lacks professionalism when a member from another flotilla either removes our info or places theirs at the same location which could overcrowd the business partner. I hope that we could settle this issue quickly and professionally. There is way too many businesses not served in our areas to overrun the same location over and over.

Sincerely,
Joseph L. Nemeth
