October Report 054-10-01 19/OCT/2017

Membership:

We have currently two members seeking retirement status after long years of service, Ronald Mackey, since 1980 and William Fisher. We currently have one member non AMT compliant than we no longer can contact due to inaccurate contact info. After several failed attempts and lack of dues payments this member (Stephen Murray) will be dis-enrolled. We have one member (Jack Disarno) that has gone 1 year without completing AMT and has no intention of compliance. He will be dis-enrolled also.

We also have one new member application completed, we are very excited about her interest and promising attitude!

Station Report:

We have currently 3 members assisting at station WB as watch standers. We have 6 members that assist weekly in protective gear inspections & on the water ops, twice a week. Senior chief Marshburn has been more than pleased with the assistance and cooperation form 10-01.

Activities:

RBS has been a well oiled machine over the past 10 months. Our following FSO's have performed above and beyond the call of duty. Jim Sinclair PE, has increased our students to over 200 for the year. Mike Butt PV has increased our RBPV to more than 1000, with still more being performed every day. Phil Kraus VE has overseen great numbers (over 300) in vessel exams with about 25% of VEs not participating this year so far. Nick Giachino PA has been very productive in placing events and providing personnel to perform the job. We are very pleased with the goals laid out in RBS and how the membership steeped up to perform them!

Respectfully submitted,
Joseph L. Nemeth
