

SOUTHERN 5th DISTRICT
DIVISION 10
SO-MA REPORT for 20APRIL2109

1-All requested ANSC Supply orders have been filled.

2-ANSC has some request that are low on inventory that their may be a delay to ship. Re-try a request a week later?

3-ANSC is working to finish updates with our new national database. You may experience some difficulty with access. If so, try another server, e.g. explorer? ANSC has also presented their "email request sheet" for your request. Personally, I still use the older request, scan and email to ANSC. When completing your request please write and include EMP# ON YOUR REQUEST.

4-Our southeast NC Coastie repairs are just about complete. The Coastie unit itself has been completely reconditioned. The trailer repairs will hopefully be complete in the next 2 weeks. We must rewire and replace the lights for road worthy safety. The hitch has been repaired and painted. When this unit is completed, I will send a notice. This has caused an interference with presentation to events. We have aggressively working since December 2018 to inspect, repair and get all Coasties to a positive, working units. We are also training or verifying that all operators have been trained and on our "District Operator List" as required by DIRAUX. The Coastie Units are owned by the USCG.

If you need a Coastie for an event the request is on the Southern 5th site.

6-If you need product for your upcoming NSBW Events you need to order quickly, and you have a delay with order request.

7-As always, if you need assistance please contact me!

Respectfully,

Andy Cardwell SO-MA
