SUBJ: August 2019 SO-NS Report

1. Due to the change in policy that submission of 7054's by the observer should be sent simultaneously to the FSO-NS, SO-NS, ADSO-NS, DSO-NS and the ANT Coordinator, the FSO-NT's in each Flotilla should be sure that the AV's are properly completing the form with all the pertinent information including comments so that everybody receiving the forms has a full understanding what it is about.
2. Many of the more than 80 PATONS on the Division 10 list that need verification have been checked and once the ANT coordinator confirms that they are verified by the Coast Guard, they will be entered on a master list with names, numbers (LLNR/Legacy), inspection dates, chart number location, and navigation location (Latitude/Longitude) that will be retained by the SO-IS with copies to each responsible Flotilla. With this list our Division should be able to keep up with PATON verifications as they need to be done in subsequent years
3. Patrols are scheduled for PATON verifications in the Northern part of Cape Fear River as early as next week.

Respectfully submitted,

A handwritten signature in cursive script that reads "William L. Thompson".

William Thompson,
SO-NS, Division 10
