SUBJ: NAVIGATION SYSTEMS

AUX POST-STORM

No assistance was requested after the hurricanes to check the AIDs.

FLOTILLA ACTIVITY

All reports submitted have been processed.

10-01 – Completed Bradley Creek PATONS and verified the Light #2 at Harbour Village to be “working properly”.

10-05 – No reports submitted this quarter.

10-06 – 1 Discrepancy reported

ANT OAK ISLAND

The ANT asked for our assistance on the New River. We gave them a referral to an AUX who has his boat there. The ANT drove to the marina, boarded the AUX boat & were able to repair the Light. They were very appreciative!

I checked with WATERWAYS in Portsmouth about the photos we had taken a few years ago. They sent all their photos to headquarters. None went to the ANTs.

THINGS LEFT TO DO

All Avs need to have sent in (1) report for their yearly currency. Check the Local Notice, the Coast Pilot, & the Light List for errors. These could possibly be reported.

A refresher workshop will be given in the next few weeks. If needed, let me know.

A new member from 10-05 requested information on the AV qualification. I referred him to the NAT'L website for NS. He will be in touch.

Respectfully submitted,

Lois Dowty
