

# STROBE LIGHTS FOR USE AS PPE

These are acceptable ACR strobe lights

PREFERRED TYPE

Remove the wire latch using pliers.

**This type, water activated is not acceptable.**

**The water-activated type lights are not acceptable. See the two contact buttons.**

**Use “DURACELL” alkaline or lithium-ion energy cells for lowest corrosion potential with these units. Check the cells frequently for corrosion.**

**All lights are to have “hooks” type Velcro looped through the provided handles for potential attachment to the PFD or SAR vest mating shoulder “loops” material.**
