Important Updates to AUXDATA II as of 25 August 2022

AUXDATA II was updated 25 August to add some improvements described here

For Members

A new Secondary address field has been added to the Member detail page. This address field is optional but will allow a member who uses a PO box for mailing to provide a physical residential address. Also, members who have a seasonal home can indicate the address of that location. The information the member enters here will not be displayed in the AUXDirectory.

For Members, Facility Owners and Operators

On the Member's "Related" page, the Facilities table now includes Facility Name (if there is one) and call-sign. This will allow members and facility operators to more easily identify the facility they wish to look at from the Member Pages.

For DIRAUX Offices, FINCEN, OIA, BSX and ADMIN

A table is available on each Patrol Order showing FSMS Exception reports related to that Patrol Order (if any).
