USCG Auxiliary - Situation Report Dashboard
16 Aug 2021

National Emergency Management & Disaster Response has posted the Situation Report (SITREP) Dashboard web link on the Q Directorate Home Page.

The Dashboard is a work in progress. As enhancements such as Geographic Information System overlays depicting Auxiliary member locations come on-line those updates will be added to the SITREP Dashboard.

Please bookmark this link USCG AUX EM SITREP Dashboard as the Auxiliary's primary information portal for significant emergency management related notices.

Please take time to become familiar with the Dashboard's information TABS. An overview of individual tab information is listed below. This Dashboard provides in many instances live up-to-the-minute datalinks to critical Official and Non-Governmental Organization websites with a plethora of details as you drill down into the links. Access to the Dashboard is restricted only by Auxiliary Member ID and Password.

The Dashboard is the central location for posting significant District (pre & post event) Everbridge notices, Auxiliary member support activities, and member accountability data via email at sitrep@cgauxnet.us.

NOTE: The Q Dashboard Team seeks your input in developing a "Standardized DSO-EM Report" document. When created the standard report would be used when reporting up to the Q Directorate and that information will subsequently be posted in the Dashboard's DSO-EM Tab. It's anticipated using *MS Word*. There will certainly be basic common elements to any District's report. After consultation with your District Commodore please share with us your reporting needs. Please by *16 September 2021* direct your responses to sitrep@cgauxnet.us and cc to bhhanlon1389@gmail.com.
